

OPTIMIZE CIRCULATION. SUPPORT WHOLE-BODY PERFORMANCE.

Blood Flow • Vascular Health • Cellular Oxygenation

WHAT IS THE CIRCULATE INFUSION?

The Circulate Infusion is formulated to support vascular function, healthy blood flow, and efficient oxygen delivery throughout the body. By combining nutrients involved in nitric oxide production, cardiovascular health, and cellular metabolism, this infusion helps promote endurance, vitality, and overall circulatory wellness.

WHAT YOU MAY EXPERIENCE

- Improved exercise tolerance and stamina
- Better recovery following physical activity
- Increased energy during daily activities
- Improved delivery of oxygen and nutrients throughout the body
- Enhanced physical performance and endurance
- Greater overall vitality and wellness

WHO MAY BENEFIT THE MOST?

- Active individuals looking to support performance and recovery
- Patients focused on cardiovascular and vascular wellness
- Individuals seeking support for healthy aging
- Those looking to optimize oxygen utilization and nutrient delivery
- Individuals wanting to support an active lifestyle and long-term wellness goals

WHAT'S IN THE INFUSION?

Arginine - An amino acid that serves as a precursor to nitric oxide, helping promote healthy blood vessel relaxation and circulation.

Niacinamide (Vitamin B3) - Supports cellular energy production, vascular health, and metabolic function.

Pyridoxine (Vitamin B6) - Supports cardiovascular health, red blood cell function, and metabolic pathways involved in energy production.

Taurine - An amino acid that supports cardiovascular function, fluid balance, cellular protection, and healthy vascular performance.
