

RECOVER STRONGER. SUPPORT YOUR BODY'S NATURAL HEALING PROCESS.

Recovery • Tissue Repair • Nutritional Replenishment

Healing

WHAT IS THE HEALING INFUSION?

Surgery places significant demands on the body. During recovery, the body requires increased amounts of vitamins, minerals, and amino acids to support tissue repair, immune function, collagen production, and cellular recovery. The Healing Infusion was designed to provide nutrients involved in wound healing, connective tissue repair, immune defense, and energy production during the recovery process. Whether recovering from surgery, injury, or a physically demanding medical procedure, this infusion helps replenish key nutrients required for optimal healing.

WHAT YOU MAY EXPERIENCE

- Enhanced wound healing and tissue repair
- Increased energy during recovery
- Support for healthy collagen formation
- Improved nutrient replenishment following physical stress
- Support for immune system function
- Improved overall recovery and wellness

WHO MAY BENEFIT THE MOST?

- Individuals preparing for an upcoming procedure
- Patients seeking nutritional support during recovery
- Those healing from injury or physical trauma
- Individuals experiencing increased nutrient demands
- Patients looking to optimize recovery and overall wellness

WHAT'S IN THE INFUSION?

Vitamin C - A key nutrient involved in collagen synthesis, wound healing, antioxidant protection, and immune function.

B1, B2, B3, B5, B6 - Provide essential support for cellular energy production, nervous system function, and metabolic processes that become increasingly important during recovery.

Mineral Blend (Magnesium Chloride, Zinc, Manganese, Copper) - A targeted blend of essential minerals that supports tissue repair, collagen formation, immune function, antioxidant defense, and overall recovery following physical stress.

Taurine - An amino acid that helps maintain cellular health, supports immune regulation, and promotes recovery from physical stress and inflammation.
